

# The Pluto Observer

Watchdog to the Solar System

Earth Edition

August 2010

## S P E C I A L      I S S U E !

Since September 2005, *The Pluto Observer, Earth Edition* has been the "official newsletter" of Science Fiction for Thinkers.com (formerly michaelcasher.com). Michael Casher wrote each issue himself, as *Jonco Bugos*, his alter ego and literary pen name. Unfortunately, there were no readers during those five years but our star reporter persisted, offering the latest solar system news and commentary, plus a lot of tongue-in-cheek humor, as well.

Despite Michael Casher's recent medical problems, he has decided to continue *The Pluto Observer*, after five dedicated but fruitless years in search of a readership. Science Fiction for Thinkers.com will still offer *The Pluto Observer* each month, in addition to all the back issues of *The Pluto Observer* for visitors interested in historical online periodicals.

*Thanks!* to those of you who took the time to read an issue or two and our apologies for the brief interruption of this service. Be prepared for a much bolder, no-holds-barred *Pluto Observer*.
